

TOWN OF ASHFIELD – SEWER DEBT SERVICE FEE REGULATIONS

REGULATIONS GOVERNING THE APPLICATION AND SETTING OF THE SEWER DEBT SERVICE FEES FOR THE SEWER COLLECTION SYSTEM IN THE TOWN OF ASHFIELD, FRANKLIN COUNTY, COMMONWEALTH OF MASSACHUSETTS.

Be it ordained by the Board of Sewer Commissioners of the Town of Ashfield, of the Commonwealth of Massachusetts, as follows:

ARTICLE 1 – GENERAL PROVISIONS

- 1.1 These regulations set forth a fee structure to pay a portion of the annual debt service expenses of the Town of Ashfield’s wastewater facilities as approved by the Town at its October 24, 1994 Town Meeting. These regulations are a companion to two other regulations: the Sewer Fixed-Cost Operating Fee Regulations which describe the fees required to pay the operating expenses of the wastewater facilities that are not affected by volume and the Sewer Volume-Based Operating Fee Regulations which describe the fees required to pay the operating expenses of the wastewater facilities that are affected by volume. Together these three regulations constitute the User Charge System for the Town of Ashfield’s wastewater facilities.
- 1.2 Unless the context specifically indicates otherwise, the meaning of the terms used in these regulations shall be as follows:
 - 1.2.1 “Board of Sewer Commissioners” has jurisdiction over, and is the governing authority for, the wastewater collection and treatment system in the Town of Ashfield. This term shall also mean the Sewer Committee duly authorized by the Annual Town Meeting, May 6th, 1995, to have all the powers and authority usually conferred upon the Board of Sewer Commissioners until such time as the Board of Sewer Commissioners is elected.
 - 1.2.2 “Commercial Property” means any improved property that has a user class beginning with the number 3 or the numbers 03 and that is not classified as a dual-use property.
 - 1.2.3 “Currently Sewered Property” means any property currently connected to the public sewer or any property whose owner has received a notice from the Ashfield Board of Health requiring that the owner connect the property to the public sewer. A property does not have to be discharging wastewater to the public sewer to be considered a Currently Sewered Property. Any property whose owner received the June 21, 1996 notice from the Ashfield Board of Health requiring that the property be connected to the public sewer within one year of August 1, 1996 shall be considered Currently Sewered Property as of July 1, 1996. Any property whose owner received an exception (see Article 2.3 of the Sewer Use Regulations) to an Ashfield Board of Health notice requiring that the property be connected to the public sewer shall no longer be considered a Currently Sewered Property until such time as the owner of the property receives another Ashfield Board of Health notice requiring that the property be connected to the public sewer.

- 1.2.4 “Dual-Use Property” means all property with a user class beginning with the number 0 where the secondary use is responsible for greater than ten (10) percent of the property’s wastewater flow.
- 1.2.5 “Dwelling” means any privately or publicly owned permanent structure that is occupied in whole or in part as a residence of one (1) or more persons.
- 1.2.6 “Dwelling Unit” means one (1) or more living and sleeping rooms providing complete living facilities for the use of one (1) or more individuals constituting a single housekeeping unit, with permanent provision for living, sleeping, eating, cooking, and sanitation.
- 1.2.7 “Improved Property” means any property that has built upon the said property any houses or buildings that are used for human occupancy, employment, recreation, or other purposes.
- 1.2.8 “Industrial Property” means any improved property that has a user class beginning with the number 4 or the numbers 04 and that is not classified as a dual-use property.
- 1.2.9 “May” is permissive (see Shall 1.2.15).
- 1.2.10 “Owner” means every person who alone, or jointly, or severally with others (a) has legal title to any property, or (b) has care, charge, or control of any property or as agent, executor, executrix, administrator, administratrix, trustee, lessee, or guardian of the estate of the holder of legal title. Each such person thus representing the holder of legal title is bound to comply with the provisions of these regulations as if he were owner.
- 1.2.11 “Person” means any individual, firm, company, association, society, corporation, partnership, group, copartnership, joint stock company, trust, estate, governmental entity, or any other legal entity, or their legal representatives, agents, or assigns. The masculine gender shall include the feminine. Where indicated by the context, the singular shall include the plural.
- 1.2.12 “Property” means an area of land in one ownership, with definite boundaries recorded with the appropriate Registry of Deeds.
- 1.2.13 “Public Sewer” means the sewer main in which all owners of abutting properties have equal rights and that is controlled by a government agency or public entity.
- 1.2.14 “Residential Property” means any improved property that has a user class beginning with the number 1 or the numbers 01 and that is not classified as a dual-use property.
- 1.2.15 “Shall” is mandatory (see May 1.2.9).
- 1.2.16 “User Class” means the Massachusetts Department of Revenue primary land use code of an owner’s property as determined by the Town’s Assessors and recorded in their public records. The effective date for determining a property’s user class shall be January 1 preceding the current fiscal year of the sewer debt service charges.

ARTICLE 2 – APPLICATION OF CHARGES

- 2.1 The Board of Sewer Commissioners has the authority, as stated in Chapter 83, Section 16 of the Massachusetts General Laws, to “...establish just and equitable annual charges for the use of common sewers, which shall be paid by every person who enters his particular sewer therein. The statute states that “the money

so received may be applied to the payment of ...any debt contracted for sewer purposes.”

- 2.2 On or before October 1, the Town of Ashfield, acting through its Board of Sewer Commissioners, shall charge the owner of any property that was classified as Currently Sewered Property on the preceding July 1 an annual sewer debt service fee, as described in Article 3, to pay the property’s share of the annual sewer debt service costs, if any, associated with the sewer collection system serving the property. The Board of Sewer Commissioners shall bill the debt service charge on a quarterly basis.
- 2.3 The owner of any property not classified as Currently Sewered Property as of the beginning of a fiscal year and wishing to connect his property to the public sewer during said fiscal year, shall pay either a connection fee, as described in Article 4, or a permanent privilege fee, as described in Article 5, for the right to connect to the public sewer during the current fiscal year. Starting in the fiscal year following the year of the connection, the owner of the newly connected property shall pay the same annual sewer debt service fee, if any, in the same manner as all other owners of Currently Sewered Properties.
- 2.4 Any charges collected due to provisions of these regulations shall not prevent the Board of Sewer Commissioners from establishing fees and fines for other purposes connected with the sewer.
- 2.5 Any owner of a Currently Sewer Property who obtains an exemption (see Article 2.3 of the Sewer Use Regulations) to an Ashfield Board of Health notice requiring that the property be connected to the public sewer shall have all current fiscal year sewer debt service fees collected under these regulations abated.

ARTICLE 3 – ANNUAL SEWER DEBT SERVICE FEE

- 3.1 The annual sewer debt service fee shall be based on a uniform sewer unit method. A property’s annual debt service fee shall be equal to the product of the property’s designated number of sewer units (as calculated in 3.2) and the annual sewer debt service fee assigned to a single sewer unit (as calculated in 3.3).
- 3.2 Prior to establishing the annual sewer debt fee for each Currently Sewered Property, the Board of Sewer Commissioners shall calculate the number of sewer units assigned to each Currently Sewered Property by using the user class of the property as determined by the Town of Ashfield Board of Assessor’s records as of January 1 preceding the fiscal year for which the fee is due.
 - 3.2.1 Residential properties shall have their number of sewer units designated as follows:
 - 3.2.1.1 All single-dwelling properties whose user class is 101 (single-family dwelling) or 103 (mobile home) shall comprise one (1) sewer unit.
 - 3.2.1.2 All single-dwelling properties whose user class is 104 (two-family dwelling) shall comprise two (2) sewer units.
 - 3.2.1.3 All single-dwelling properties whose user class is 105 (three-family dwelling) shall comprise three (3) sewer units.

- 3.2.1.4 All single-dwelling properties whose user class is 111 (apartment houses with 4 to 8 dwelling units) shall comprise one (1) sewer unit for each dwelling unit making up the property.
- 3.2.1.5 All single-dwelling properties whose user class is 112 (apartment houses with over 8 dwelling units) shall comprise one (1) sewer unit for each dwelling unit making up the property.
- 3.2.1.6 All residential properties with multiple dwellings and all other residential properties shall comprise one (1) sewer unit per dwelling unit making up the property.
- 3.2.2 Commercial and Industrial properties shall have their number of residential equivalent sewer units designated as follows:
 - 3.2.2.1 If the average water consumption over the previous 2-year period is available, the number of equivalent sewer units is calculated using the following formula:

$$\frac{\text{Average water usage (in gallons per day)}}{160 \text{ gallons per day}} = \text{number of equivalent sewer units}$$

- 3.2.2.2 If the average water consumption over the previous 2-year period is unavailable, the number of equivalent sewer units shall be calculated using average wastewater estimates as contained in Section 15.203 of “The State Environmental Code, Title 5: Standard Requirements for the Siting, Construction, Inspection, Upgrade, and Expansion of On-Site Sewage Treatment and Disposal Systems and for the Transport and Disposal of Sewage” and the following formula:

$$\frac{\text{Title 5 wastewater flow estimate based on property use (in gallons per day)}}{2 \times 130 \text{ gallons per day}} = \text{number of equivalent sewer units}$$

(Title 5 estimates use maximum wastewater flow, dividing by 2 converts the value found in Title 5 to an average flow. In order to account for wastewater flow versus water consumption, the wastewater flow is divided by 130 gpd [80% of 160 gpd].)

- 3.2.2.3 In the calculations in 3.2.2.1 and 3.2.2.2 all partial sewer units shall be rounded to the nearest whole number of sewer units.

3.2.3 Dual use properties shall be assigned a number of sewer units based on their secondary uses in addition to their primary use. Sewer units for their residential portion shall be calculated as described in 3.2.1.6. Sewer units for their commercial and industrial portions shall be calculated as described in 3.2.2 (with an allowance for the residential use). Dual use properties shall comprise a minimum of 2 sewer units.

3.3 The annual sewer debt service fee for a single sewer unit shall be calculated using the following steps:

3.3.1 Step 1 – Calculate the Basic Unit Fee as follows:

$$\text{Basic Unit Fee} = \frac{\text{Projected sewer debt service costs for the fiscal year}}{\text{Total number of sewer units for all Currently Sewered Property}}$$

3.3.2 Step 2 – Calculate the Other Fees Unit Credit attributable to each currently sewered unit as follows:

Total Other Fees collected, if any, in the previous Fiscal year (see Article 4 and 5)

$$\text{Other Fees Unit Credit} = \frac{\text{Total Other Fees collected, if any, in the previous Fiscal year (see Article 4 and 5)}}{\text{Total number of sewer units for all Currently Sewered Property}}$$

3.3.3 Step 3 – Calculate the Sewer Unit Fee for the current fiscal year as follows:

$$\text{Sewer Unit Fee} = \text{Basic Unit Fee} - \text{Other Fees Unit Credit}$$

3.3.4 The following example is provided for illustrative purposes only:

Number of Current Sewer Units = 154 (including 5 new units in the previous fiscal year)

Annual Debt Service Costs = \$27,200

Other Fees paid in previous fiscal year \$1825.50

Step 1 – Calculate the Basic Unit Fee:

$$\$27,200 / 154 = \$176.62$$

Step 2 – Calculate the Other Fees Unit Credit:

$$\$1825.50 / 154 = \$11.85$$

Step 3 – Calculate the Sewer Unit Fee:

$$\$176.62 - \$11.85 = \$164.77$$

- 3.4 During the first two years of operation the system may have a very small number of Currently Sewered Properties. Therefore, the Board of Sewer Commissioners shall use an “equitable rate” for the annual debt service fee for a single sewer unit. The utilization of this initial “equitable rate” shall avoid undue burden of cost upon those users initially connecting to the wastewater facilities.
- 3.4.1 The “equitable rate” shall be based on the number of users that will be connected to the wastewater facilities two years after its start of operation. This is estimated at 140 in the first year of the system operation. Therefore, for the first two years of operation (FY1997 and FY1998) the number of Currently Sewered Properties used in 3.3 shall be the actual number of Currently Sewered Properties or 140 whichever is greater in value.

ARTICLE 4 – SEWER CONNECTION FEE

- 4.1 The Board of Sewer Commissioners has the authority, as stated in Chapter 83, Section 20 of the Massachusetts General Laws, to establish a “reasonable amount” upon the payment of which “the owners of land or parts thereof not liable to assessment, or not in fact assessed, may use the common sewers for disposal of their sewage from such land”.
- 4.2 Any owner of property that connects his property to the public sewer, and elects not to pay a permanent privilege fee under Article 5, shall pay a sewer connection fee, as specified in 4.3 and 4.4, for the right to connect to the public sewer. The sewer connection fee, if any, shall be payable in full at the time of the connection to the public sewer.
- 4.3 For owners of all property connecting to the public sewer during a fiscal year in which there are ongoing debt service payments, the sewer connection fee shall be calculated as follows:

Step 1 – For each fiscal year, preceding the fiscal year of the connection, in which there was an annual debt service fee for any current debt payment schedules, calculate the following:

Number of sewer units that fiscal year for the subject property	x	The portion of the Sewer Unit Fee in effect during that fiscal year related to any current debt payment schedules
---	---	---

Step 2 – If the property is not classified as a Currently Sewered Property at the time of the connection, calculate the following:

Number of sewer units in the current fiscal year for the subject property x The portion of the Sewer Unit Fee in effect during the current fiscal year related to any current debt payment schedules

Step 3 – To calculate the connection fee due, sum the yearly fees calculated in Step 1 and Step 2.

Example: The following example is provided for illustrative purposes only: In this example a property is connecting to the public sewer in the second fiscal year of a current sewer debt payment schedule. The owner has not received a notice requiring such connection; therefore, the property is not classified as a Currently Sewered Property at the time of the connection.

Sewer units in property connecting = 2
Sewer connection being made in FY1998

Step 1 – Sewer unit fee in previous fiscal years (FY1997) = \$188.90
Step 2 – Sewer unit fee in current fiscal year (FY1998) = \$166.24
Step 3 – Sewer Connection Fee = 2 x \$188.90 + 2 x \$166.24 = \$710.28

- 4.3.1 Except in years in which an equitable rate is being used (See 3.40), the Board of Sewer Commissioners shall use all fees collected under 4.3 to offset the debt service fees charged to all Currently Sewered Properties in the following fiscal year. If there are no debt service fees in the following year, the Board shall credit all fees collected under 5.3 to all owners of property classified as Currently Sewered Property in the following year.
- 4.4 For owners of property connecting to the public sewer in fiscal years when there are no ongoing debt service payments, the connection fee shall be the sum of the following:
 - 4.4.1 The product of the number of sewer units of the property and seventy-five percent (75%) of the total debt service charges for the last capital project collected for one sewer unit. All fees collected under this section shall be used as Surplus Revenue and transferred to the Retained Earnings of the Enterprise Fund and may be used the following fiscal year to offset the year's operating expenses.
 - 4.4.2 One hundred percent of any cost associated with upgrading the wastewater facilities to handle the new property. This cost includes any capital costs associated with future treatment facility expansion, sludge handling and disposal costs. The Board of Sewer Commissioners shall use any fees collected under this section for the capital projects for which they were collected.
- 4.5 The owner of any property paying a connection fee shall begin paying annual sewer debt service fees, if any, in the fiscal year following the fiscal year during which they connect to the public sewer.

ARTICLE 5 – SEWER PRIVILEGE FEE

- 5.1 The Board of Sewer Commissioners has the authority, as stated in Chapter 83, Section 17 of the Massachusetts General Laws, to establish a “reasonable amount” the payment of which “shall pay for the permanent privilege of [an] estate” to use “such main drains or common sewers”.
- 5.2 Any owner of property that connects his property to the public sewer, and elects not to pay a connection fee under Article 4, shall pay a permanent privilege fee, as specified in 5.3 and 5.4, for the right to connect to the public sewer. The permanent privilege fee, if any, is subject to the provisions of Chapter 80 of the Massachusetts General Laws relative to apportionment, division, reassessment, abatement and collection of assessment, and to interest.
- 5.3 For owners of all property connecting to the public sewer during a fiscal year in which there are ongoing debt service payments, the sewer permanent privilege fee shall be calculated as follows:

Step 1 – For each fiscal year, preceding the fiscal year of the connection, in which there was an annual debt service fee for any current debt payment schedules, calculate the following:

Number of sewer units that fiscal year for the subject property	x	The portion of the sewer unit charge in effect during that fiscal year related to any current debt payment schedules
---	---	--

Step 2 – if the property is not classified as a Currently Sewered Property at the time the connection is made, calculate the following:

Number of sewer units in the current fiscal year for the subject property	x	The portion of the sewer unit charge in effect during the current fiscal year related to any current debt payment schedules
---	---	--

Step 3 – Calculate permanent privilege fee due, sum the yearly fees calculated in Steps 1 and 2.

Example: The following example is provided for illustrative purposes only: In this example a property is connecting to the public sewer in the second fiscal year of a current sewer debt payment schedule. The owner has not received a notice requiring such connection; therefore, the property is not classified as a Currently Sewered Property at the time of the connection.

Sewer units in property connecting = 2
Sewer connection being made in FY1998

Step 1 – Sewer unit fee in previous fiscal years (FY1997) - \$188.90
Step 2 – Sewer unit fee in current fiscal year (FY1998) = \$166.24

Step 3 – Permanent Privilege Fee = 2 x \$188.90 + 2 x \$166.24 = \$710.28

- 5.3.1 Except in years in which an equitable rate is being used (See 3.4), the Board of Sewer Commissioners shall use all fees collected under 5.3 to offset the debt service fees charged to all Currently Sewered Properties in the following fiscal year. If there are no debt service fees in the following year, the Board shall credit all fees collected under 5.3 to all owners of property classified as Currently Sewered Property in the following year.
- 5.4 For owners of property connecting to the public sewer when there are no outstanding debt service payments, the permanent privilege fee shall be the sum of the following:
 - 5.4.1 The product of the number of sewer units of the property and seventy-five percent (75%) of the total debt service charges for the last capital project collected for one sewer unit. All fees collected under this section shall be used as Surplus Revenue and transferred to the Retained Earnings of the Enterprise Fund and may be used the following fiscal year to offset the year's operating expenses.
 - 5.4.2 One hundred percent of any cost associated with upgrading the wastewater facilities to handle the new property. This cost includes any capital costs associated with future treatment facility expansion, sludge handling and disposal costs. The Board of Sewer Commissioners shall use any fees collected under this section for the capital projects for which they were collected.
- 5.5 The owner of any property paying a permanent privilege fee shall begin paying annual sewer debt service charges, if any, in the fiscal year following the fiscal year during which they connect to the public sewer.

ARTICLE 6 – APPEAL PROCESS

- 6.1 Any person receiving a bill for the fees described in these regulations may request a hearing before the Board of Sewer Commissioners by filing, within thirty (30) days (excluding Saturday, Sunday, and any legal holidays in the Commonwealth) after the mailing date of the bill containing said fees, in the office of the Board of Sewer Commissioners, a written letter requesting a hearing on the matter. Upon receipt of such request, the Board of Sewer Commissioners shall set a time and place for such a hearing and shall inform the petitioner thereof, either by serving the petitioner personally or by certified mail, return receipt requested, at least seven (7) days before the hearing.
- 6.2 The hearing shall commence not later than fifteen (15) days after the date on which the written request for a hearing was filed, provided that upon application of the petitioner, the said Board may postpone the date of the hearing for a reasonable time beyond the fifteen (15) day period.
- 6.3 The Board of Sewer Commissioners may themselves conduct the hearing and take evidence, or the said Board may designate any of their members or any officer or employee of the Town to:

- 6.3.1 Issue, in the name of the Board of Sewer Commissioners, notices of hearings requesting the attendance and testimony of witnesses and the production of evidence relevant to the matter involved in such a hearing.
- 6.3.2 Take the evidence.
- 6.3.3 Transmit a report of the evidence and hearing, including transcripts and other evidence, together with recommendations to the Board of Sewer Commissioners for action thereon.
- 6.4 At any hearing held pursuant to these regulations, testimony taken shall be under oath and shall be recorded. A transcript or tape shall be made available to any member of the public or any party to the hearing upon a written request and payment of the usual charges thereof.
- 6.5 Within ten (10) days of the commencement of the hearing and after the Board has reviewed the evidence, the Board of Sewer Commissioners shall vote to sustain, modify, or withdraw the fees originally billed and shall notify the petitioner, either by serving the petitioner personally or by certified mail, return receipt requested, of its decision within three (3) days after said vote.
- 6.6 If a written request for a hearing is not filed within thirty (30) days (excluding Saturday, Sunday, and legal holidays in the Commonwealth) after the fees have been billed (as described in 6.1), or if, after a hearing, the fees have been sustained in any part, any sustained fees shall be due and payable immediately.
- 6.7 A pending appeal under Article 6 does not stay the collection of the original fees billed. To avoid the fees becoming a lien on the property, as described in Massachusetts General Law Chapter 83, Section 16B, all fees originally billed must be paid within 30 days.
- 6.8 All persons losing the right of appeal under 6.6 shall still maintain their right to an abatement hearing as described in MGL Chapter 83, Section 16E.

ARTICLE 7 – VALIDITY

- 7.1 The invalidity of any section, clause, sentence, or provisions of these regulations shall not affect the validity of any part of these regulations that can be given effect without such invalid part or parts.

ARTICLE 8 – CHANGES IN THESE REGULATIONS

- 8.1 The Board of Sewer Commissioners may rescind or modify or add to these regulations at any time when, in their opinion, such action is in the best interests of the Town of Ashfield, provided they comply with all provisions of the Massachusetts General Laws, as amended.

ARTICLE 9 – REGULATIONS IN FORCE

- 9.1 These regulations shall be in full force and effect from and after passage, approval, or publication as provided by law.
- 9.2 Passed and adopted by the Board of Sewer Commissioners of the Town of Ashfield, State of Massachusetts, on the Seventeenth day of June, 1996.

Bill Perlman, Chairman

Don Robinson

Diane Muller

Attest: Anne Yuryan
(Town Clerk)

Amendments adopted September 16, 1996
Amendments adopted November 20, 2014

APPENDIX A – CONNECTION SCHEDULE

A-1 The Ashfield Board of Health, in a vote taken May 2, 1994, pursuant to Massachusetts General Laws Chapter 83, Section 22, voted to require the following properties to connect to the public sewer constructed during the year 1996 and established a schedule for sewer connections:

Map	Parcel	St. No.	St. Name	Last Name	First Name
4-1	1	194	Buckland Road	R. McCarthy	United Bank
4-1	2	204	Buckland Road	Barry	Steve
4-1	3	212	Buckland Road	Humiston	Thomas
4-1	4	222	Buckland Road	Levenson	Robert M.
4-1	5	242	Buckland Road	Smeraldi	Lawrence
4-1	6	268	Buckland Road	Rizzo	Andrea
4-1	7	280	Buckland Road	Sustick	Paul
4-1	8	286	Buckland Road	Galipault, Jr.	James
4-1	9	294	Buckland Road	Aiken	James G.
4-1	10	308	Buckland Road	McDonald	Richard
4-1	11	332	Buckland Road	Hayde	William
4-1	24	335	Buckland Road	Club Bona Vista	c/o John Hoyt
4-1	25	325	Buckland Road	Hoyt	Judith
4-1	27	305	Buckland Road	Gilmore	Gregg
4-1	28	267	Buckland Road	Wood	Frederick M.
4-1	30	249	Buckland Road	Temple	John

APPENDIX B – DEBT SERVICE REPAYMENT

The following table shows the estimated debt service fees for a single sewer unit for the four fiscal years beginning July 1, 1996. All information shown is based on connections being made after the property owners receive their notice from the Ashfield Board of Health and furthermore that all owners receiving notices on June 1 of any year do not actually connect until after July 1. This chart contains estimated fees only and shall not be legally binding.

FISCAL YEAR	ESTIMATED CONNECTED EDU'S	DEBT SERVICE per YEAR	DEBT SERVICE per EDU
1997	140	\$32,797	\$234

1998	144	\$32,797	\$228
1999	149	\$32,797	\$220
2000	154	\$32,797	\$214
