BOARD OF HEALTH POLICY

TITLE V – SEPTIC PUMPING POLICY

The Septic tank must be pumped as part of each inspection, unless that tank has been pumped within 1 year prior to the inspection and such pumping was properly reported by the pumper to the Board of Health. Such a procedure must be performed by a pumper with a current license to perform such services. The Board of Health may, at its discretion, waive this requirement.

Adopted: March 18, 2021
